

Online Lesson Structure

MEET + CONNECT

Meet and connect with your students through Microsoft TEAMS at the beginning of each session.

HOOK + FOCUS

Launch the learning intention for the lesson - getting the students brains active and focused.

THE CORE

Chunk learning into achievable bites that are engaging + varied for students. This should include purposeful interactive activities for students to collaborate with their peers.

ACTION

Provide opportunities for students to practice and apply their learning. Students can demonstrate their understanding through a variety of ways either independently or collaboratively.

WRAP UP

Final connection at the end of each session to thank and farewell students. Teachers could use this time to conduct a digital exit ticket.

80/20 RULE

80% student action
20% teacher interaction
