

Getting familiar with High School life

Ulladulla High School held an Expo Day for Education Week. Year 8 students worked with Year 5 students from Milton Primary School. Each Year 8 class held a different activity for the younger students, which ranged from discussions about water in third world countries to first aid demonstrations and to revealing how many resources one person is capable of using. The day gave Primary students a view of High School life as well as a chance to learn new and exciting things, different from their usual classes.

Our Year 8 students should be commended for the way they conducted themselves throughout the day and the effort they put into their class projects. All the older students were astounding role models and were wonderful representatives of Ulladulla High.
