

## Sizzling Science Fair!

On Monday the 23<sup>rd</sup>, Year 9 held their science fair. Many members of the community attended to see Year 9's work so far this term. Experiments included everything from pulling tablecloths from underneath a dinner set, to snails critiquing which colour of paper they would prefer as a snack. We had coke rockets, and even shattered roses! People of all ages attended, and voted for their favourite. Congratulations to Riley for winning overall first prize with his ice-cream (it was a fair win; there was no bribery involved!). Well done to all who participated; all experiments were interesting and informative. We look forward to the next great Science Fair.
