

Geography Elective – Oceanography, Primary Production and Fieldwork

Geography Elective is a Board Developed Course

Course details are included on RoSA

Course details are included on School Report

This course is the study of places and the relationships between people and their environments. It is a rich and complex discipline that integrates knowledge from natural sciences, social sciences and humanities to build a holistic understanding of the world. Through the study of Geography, students are encouraged to question why the world is the way it is, reflect on their relationships with and responsibilities for the world and propose actions designed to shape a socially just and sustainable future.

It emphasises the physical, social, cultural, economic and political influences on people, places and environments, from local to global scales. It also emphasises the important interrelationships between people and environments through the investigation of contemporary geographical issues and their management. The wellbeing of societies and environments depends on the quality of interactions between people and the natural world.

The study of this course enables students to become informed, responsible and active citizens able to evaluate the opinions of others and express their own ideas and arguments. This forms a basis for active participation in community life, a commitment to sustainability, the creation of a just society, and the promotion of intercultural understanding and lifelong learning. The skills and capabilities developed through geographical study can be applied to further education, work and everyday life.

Subject Assessment: In this course, there is an assessment as learning approach. This involves students in the learning process where they monitor their own progress, ask questions and practise skills. Students use self-assessment and teacher feedback to reflect on their learning, consolidate their understandings and work towards learning goals.

Course Advisers: Mr B Barry
